COMP 4350 - Idea List

Please add your app ideas to the list and include a short description if it isn't straightforward. Try to come up with 3-5. We will individually look over the list on the weekend so try to have your ideas listed by Saturday. I'll update the instruction again later tonight.

- Tv Show Recommendation List
    - Social recommendation list, see what your friends recommend and even ask other people to recommend stuff for you
    - Can be branched out to games/movies/etc.
- Course Review App (Can be any course really)
    - User gets asked a question to answer
        - if wrong, they are shown the answer with an adequate explanation
    - User must submit a question into the DB after they answer a question
- Uber Favor App
    - Similar style to Uber but for favors (like bring this thing from one place to another)
    - Favors get stored in db, user filters by whatever they would like and choose the favor that they want to do
- Course notes app
    - Social app where course notes can be uploaded and shared with other classmates
    - Comments can be added to notes if something important was missed
    - Notes can added to a db, and downloaded by others
    - Can be sorted by university, department, course number, and term
- 2 truths 1 lie trivia app
    - User is given 2 truths and a lie and has to guess the lie
    - Truths and lies can be created by friends (for a social aspect)
    - Questions and answers stored in a db
- Speed texting game
    - 1v1 speed texting fighting style game
    - Multiple words of various lengths appear on the screen, if you finish the word before the other person you deal "damage" to them. Longer words do more damage.
    - Words and phrases stored in a database
    - Autocorrect/auto finish obviously disabled
- Letter Scramble game
    - Similar to other word games, 2 people are given a jumble of random letters. They have a time limit, and whoever can make the most words using the letters wins. Points based on length of word and speed.
    - Database of all words
    - I feel like this might have already been done, but with so many word games it's difficult to find
- Restaurant pairing app
    - Lets users meet up with a random person at a diner or coffee shop so lonely people don't have to eat alone

- Baby App
    - An app that mimics a baby eg crying, feeding, pooping, to train people how to care for a baby
- Booze Delivery App
    - Like skipthedishes but for booze
- Apartment Manager APP
    - Managers send messages to residents through the app
    - Residents need to mark the message when they read it
    - The system can check who has read the messages and resend the message to residents who have not checked in a certain time
    - Second-hand market
    - bulletin board
- Picture Jigsaw Puzzle APP
    - someone take a picture of a particular place
    - someone take another pictures of the same place
    - these pictures can make up a complete picture of that place
- Homemade Dinner Party APP
    - the users could either be the hosts or the guests
    - hosts can post arrangement of the dinner include food, drinks and discussion topics with certain price
    - the party offer food and will invite a guest to present a speech about the topic
    - there are limited numbers of guests, they need to reserve and pay for the dinner
